

## PRELIMINARY SPECIFICATIONS

# PIPELINE REPORTER

Made to address the challenges of traveling correspondents who often deliver their reports via Skype or Messenger from a webcam on a desktop, BBS will present the Pipeline Reporter 3200, 4300 and 5600 Kits.

The remote phosphor LED fixtures in the Reporter Kits deliver modeled lighting with a high CRI, to an on-camera reporter under a wide range of ambient lighting conditions.

The footprint of each fixture is less than the computer mouse and set up takes just a minute.

Each 2-fixture kit, complete with versatile power accessories and everything else needed, comes in its own lightweight case that easily meets onboard travel regulations.

- No flicker
- Easy to use
- Flexible
- Lightweight
- Compact
- Low power consumption
