## CAPTIV

The CAPTIV positioning bar promotes loading of the carabiner on the major axis, limits the risk of rotation and keeps it integrated with the device or lanyard. CAPTIV is compatible with OK, Am'D, WILLIAM, OXAN, Bm'D carabiners and the ROLLCLIP A pulley carabiner.

Used with the I'D descender, the CAPTIV connector positioning bar limits the risk of flipping the carabiner and integrates it with the device.

During progression with an ABSORBICA lanyard, the CAPTIV bar helps integrate the carabiner, limiting the risk of losing it, and favors loading it along the major axis.

---

**Short Description** Connector positioning bar (pack of 10)

---

**Selling Points**

- Designed to promote loading of the carabiner on the major axis and to limit the risk of rotation
