

APOLLO LIGHT

The Apollo Light is an entry level lamp manufactured to a professional standard. This rugged light is constructed entirely of metal and runs off a 24V supply.

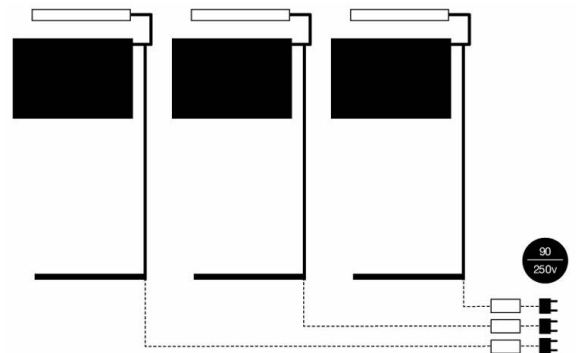

Product code:
- 73Q06

Ways to power...

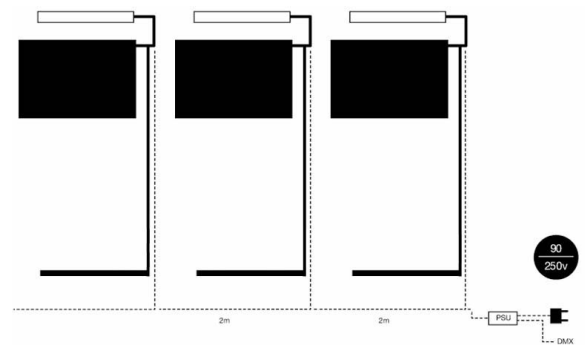

1) Plug top Mains Adaptor

The Apollo Light comes with one adaptor which is included in the price of a single unit. One adaptor is required to power each light. Each adaptor plugs straight into the mains supply and comes with 2m of cable terminating in a DC plug.

2) DMX-PSU

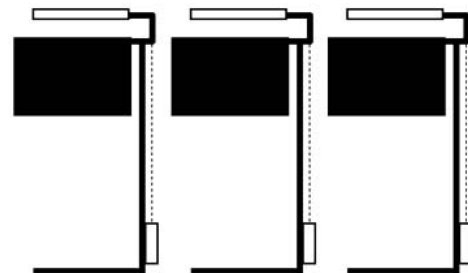

Alternatively the Apollo Light can be powered by the DMX-PSU. The DMX-PSU connects to the Apollo Light in a chain formation of up to 24 lights from 3 outputs. A cable connects to the DMX-PSU and then has 8 available sockets stemming from it where the lights are connected.

3) Rechargeable batteries

*coming soon

Batteries can be recharged using the single fast charger, or the charging station which charges up to 10 batteries simultaneously.
