# Tetra2<sup>™</sup>

TETRAgnatha's are linear bars building on the Spiider and Tarrantula technology with TETRA2<sup>™</sup> the uncompromising leader of the Tetra family.

#### Light source

18x 40 W RGBW LED multichips

# **Light output** 8.439 lm

**Zoom range** 4° - 45°

# Effects

2x MCFE<sup>™</sup> - Multi-Coloured Flower Effects creating spectacular multicolour beam effects in the air rotating in both directions at variable speed (patent pending), pixel control, virtual colour wheel, tungsten lamp effect

Generating an ultra-tight 4° beam from each of the 18 pixels, they combine to produce a bright, defined "sheet" of light, desired by Lighting Designers. Seamless curtains of light can be constructed using several fixtures as the detailed design allows any combination of TETRA1<sup>™</sup> and TETRA2<sup>™</sup> to be placed end to end on stage or truss, whilst maintaining equal spacing between pixels. With the addition of two exclusive Robe patented MCFE<sup>™</sup> - Multi-Coloured Flower Effects, the pixel-driven Tetra1 sets itself apart from others by projecting charismatic in- air animations.

The homogenised beams, together with the smooth 11:1 zoom, provide; a wash out to 45°, a footlight, a wall graze or dynamic in-air effects with fast paced sweeping movements. Utilizing our latest L3™ (Low Light Linearity) dimming system for an imperceptible fade to black, the 18-bit control provides ultra-smooth colour mixing across the full colour spectrum. An embedded Ethernet switch and wide range of protocols (sACN, Art-Net or Kling-Net) allow a quick network installation and ease of control from media servers, DMX or the internal effects engine.
