

TRUE COLOR™

ULTIMATE FAMILY

True Color™ haze generators

The 5th generation of the Ultimate series is compact, easy to use and creates a perfect lighting designer's canvas. Featuring crystal-clear atmospheric haze, maximum gain of brightness and True Color™ rendering.

TRUE COLOR™ HAZE

Ultimate 2000 & 3000 are True Color™ hazers. When used with the applicable fluid your lighting and ambience tones render naturally and as you initially intended. Small haze particles increase resolution of the atmosphere, and the haze is virtually invisible until it is illuminated.

CALM HAZE

Efficient output distribution with hang time up to four hours effortlessly brings calm haze to your venue.

FLUID CONSUMPTION

Ultimate 2000 & 3000 only uses 50 ml (1.9 oz) of fluid per hour at full output & continuous operation. One 5L (1.3 U.S. gal) fluid canister will last for approx. 80 (!) hours.

POWER ON & GO

Instant on, no warm-up time required and the hazers can operate manually and through DMX.

QUIET OPERATION WITH ULTIMATE 3000

Compressor and haze units can be used as one compact hazer or placed separately up to 25 m (82 ft) apart for whisper-silent operation.

MADE IN SWEDEN

The Ultimate series is built with premium components, handcrafted and manufactured in Sweden.

SPECIFICATIONS

Fluid consumption	0.05 ltr (1.9 oz.) per hour.
Reservoir capacity	2.0 ltr (0.53 US gallon)
Continuous running time	appr. 40 hours
Haze color	True white
Particle size	0,7 - 1 micron
Warm-up time	None
Fluid types	SWEFOG ULTIMATE C FLUID, C-XL FLUID and CRYSTAL FLUID
